

Sedecal V

The Sedecal V is a versatile variable-height veterinary x-ray system designed for flexible everyday imaging. Its four-way floating tabletop, adjustable counterbalanced Canon tubehead and $\pm 90^\circ$ lockable rotation make patient positioning straightforward, while the 17-inch touchscreen with over 300 anatomical presets helps keep workflow quick and efficient. Fully compatible with CR and DR systems.

KEY FEATURES

-  Sliding tube support column for maximum flexibility
-  Four-way floating top table
-  Adjustable height counterbalanced tubehead
-  Lockable tubehead rotation $\pm 90^\circ$
-  Standard tabletop size 1500mm x 710mm, optionally 1950mm x 710mm
-  Foot-operated electromagnetic table locks
-  Under-table CR cassette or DR panel holder
-  17-inch colour touchscreen control
-  Over 300 anatomically programmed preset factors
-  Touchscreen can be wall, tube or pedestal mounted
-  Dual focus Canon rotating anode tubes used throughout
-  Suitable for use with all CR and DR systems

GENERATOR OPTIONS

20kW	125kV 320mA
32kW	125kV 400mA

TABLE SPECIFICATION
